

Detailed Jungle Fort® Site Plans appear for preview on the next 4 pages. The top consideration to use for selection of any backyard playground plans, site plans, play activity locations or accessory layout – is Safety of the finished product. More about configurations and safety follows:

Detailed Play offers more sensible configurations, add-ons, and options than any other “Do-it-Yourself” play company. **All of our playground designs meet or exceed ASTM & CPSC safety standards for Residential/Backyard Playground Equipment.** Detailed Plans are designed to provide flexible, low-cost, fun play activities without sacrificing safety, quality, or features!

Important Notice: Our well-thought-out, professionally-designed backyard playground configurations and site plans **do not allow children to easily defeat the safety barriers!** Keeping the kids Climbing, Swinging, and Sliding (CSS) where they should be, is design for safety goal #1. The Safety Rails on each side of our Gangplank Ramp, our innovative new rock wall entrance design, and our Site Plans that clearly keep CSS play activities separated, are excellent examples to consider when thinking safety.

Features/Benefits that you will receive with Detailed Play Systems and nowhere else: The **Gangplank Ramp**, full-length **2x2 handrails** for safer Inclined Ladder climbing, the Innovative **NEW! “½ Fort Wall Safety Barrier”** for Rock Wall climbing, and our **Heavy Duty A-Frame** swing beam support design (see **Jungle Fort Swingset Kit** web page) are DPS **EXCLUSIVES**.

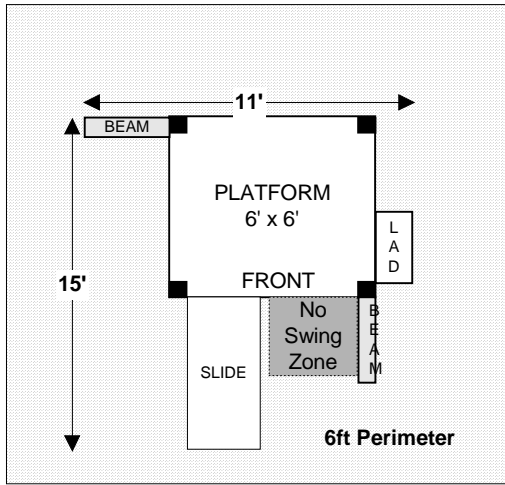

Why Choose Detailed Play Systems?

(a) For reasons you’ve read above.

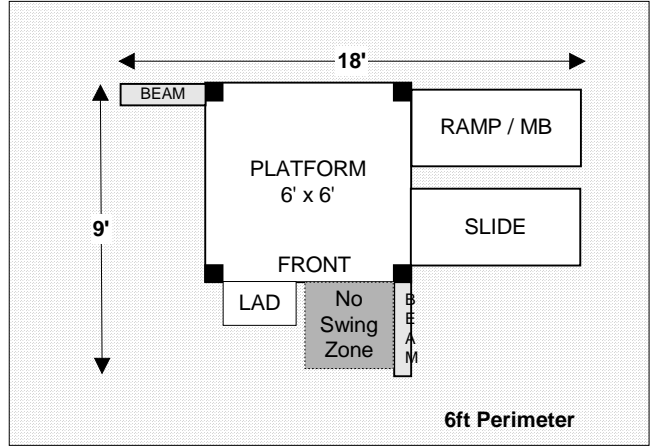

(b) We include **MORE**. Detailed Plans, plus over 40lbs. of top quality, hot-dipped galvanized bolting / screw / fastener / bracing hardware that is **SPECIFICALLY DESIGNED** for today’s lumber treatments and to last longer! The best grade of residential playground equipment parts, swings and chain, hardware, slides, and accessories available anywhere!
